Position Overview

We are looking for a creative and detail-oriented Front-End Web Developer to join our dynamic team. In this role, you will design, develop, and implement user-facing features while collaborating with cross-functional teams to deliver high-quality solutions.

This is a Full Time (TERM) position with the possibility of extension, operating in a hybrid work environment. The role occasionally requires attendance at on-site meetings

Qualifications & Requirements

- Excellent communication skills, both written and oral.
- Strong understanding of Object-Oriented Programming concepts.
- Proficiency in CSS, PostgreSQL, and ReactJS.
- Hands-on experience integrating websites with Azure and AWS.
- Knowledge of additional programming languages is an asset.
- Familiarity with Microsoft Azure is highly valuable.
- Experience with Prisma is considered asset.
- A degree, certificate, or diploma in a relevant field is an advantage.

Specific Responsibilities

- Design, implement, test and document features.
- Collaborate effectively with team members to achieve project goals and meet deadlines.
- Explore innovative approaches to solve technical challenges and improve development processes.
- Working closely with our Product Management team to understand user requirements.
- Document systematic investigations and technical uncertainties.

Other

- All other duties as assigned

Reporting Relationship

Reports to: IT Manager
